ROYAL AFRICAN KINGDOMS UNION

Development Delivery & Open Data

A practical framework for preparing, measuring, and sharing development work.

RAKU Research & Development | 5 November 2026

Productive economies

Develop local processing, manufacturing, trade-ready enterprises, and responsible mineral value chains. Prioritize skills transfer, African suppliers, and transparent commercial terms. Suggested measures: Local procurement; sustained jobs; processing capacity used.

Food and land

Strengthen farmer services, irrigation where suitable, storage, market access, and agro-processing alongside soil, water, and ecosystem protection. Suggested measures: Farm income; post-harvest losses; functioning storage.

Learning and innovation

Connect schools, technical training, apprenticeships, research, and digital capability to community needs and employer demand. Suggested measures: Completion; employment after training; innovations adopted.

Energy, water and connectivity

Prepare maintainable electricity, water, sanitation, transport, and broadband projects with credible operation and financing plans. Suggested measures: Service uptime; safe water availability; affordable connections.

Health and wellbeing

Support qualified healthcare partners, prevention, nutrition, and usable medical equipment with training, maintenance, and recurring supplies. Suggested measures: Equipment functioning; continuity of supplies; access to care.

Women, youth and diaspora

Connect enterprise mentoring, leadership participation, procurement opportunities, and diaspora expertise to locally owned development. Suggested measures: Enterprise survival; paid youth placements; knowledge transfer.

Heritage and peaceful cooperation

Protect cultural assets, creative livelihoods, and voluntary dialogue among kingdoms as foundations for trusted cooperation. Suggested measures: Cultural livelihoods; preserved records; sustained dialogue.

How to use the data

This is a curated starting point, not an exhaustive African statistical system. Reference years vary. Projections are not census counts. Continental aggregates cannot describe every kingdom, country, city, or community.

Compare like with like

Keep geography, age bands, units, price basis, and reference year consistent. ITU Africa and UN Africa are different groupings. Sub-Saharan Africa excludes North Africa. Current-dollar GDP is affected by prices and exchange rates.

Local evidence for decisions

Combine published statistics with lawful, consent-based local needs assessments. Record the source, collection date, sample, missing values, and uncertainty. Do not publish personal health records or identifiable household data.

Update and reuse

This edition was reviewed on 5 November 2026. Statistics are a dated snapshot, not a live feed. The downloadable CSV preserves definitions. Consult the originating provider for updates, methodology, and reuse terms.

Project preparation checklist

Define the problem and beneficiaries; identify the authorized project owner; verify land and access arrangements; assess feasibility and environmental impacts; estimate capital and recurring costs; establish procurement, financing, service delivery, maintenance, and monitoring responsibilities.

Accessible public information

Use readable HTML alongside PDFs, descriptive links, keyboard-accessible controls, meaningful image descriptions, and clear tables. Accessibility is an ongoing improvement commitment; this report does not certify compliance with a specific accessibility standard.

Sources and publication notes

Original RAKU synthesis. The crest identifies RAKU as publisher; it does not imply endorsement by data providers. Figures retain their source coverage and reference year. This publication presents development priorities, not funding commitments.
